

These colors are for lights fitted with Tefzel® High Temp wire

Important Notes:

This new generation Nav/Strobe is equipped with A 'Built In' synchroniser.

The YELLOW wire is the synchronising OUTPUT

Connection Instructions:

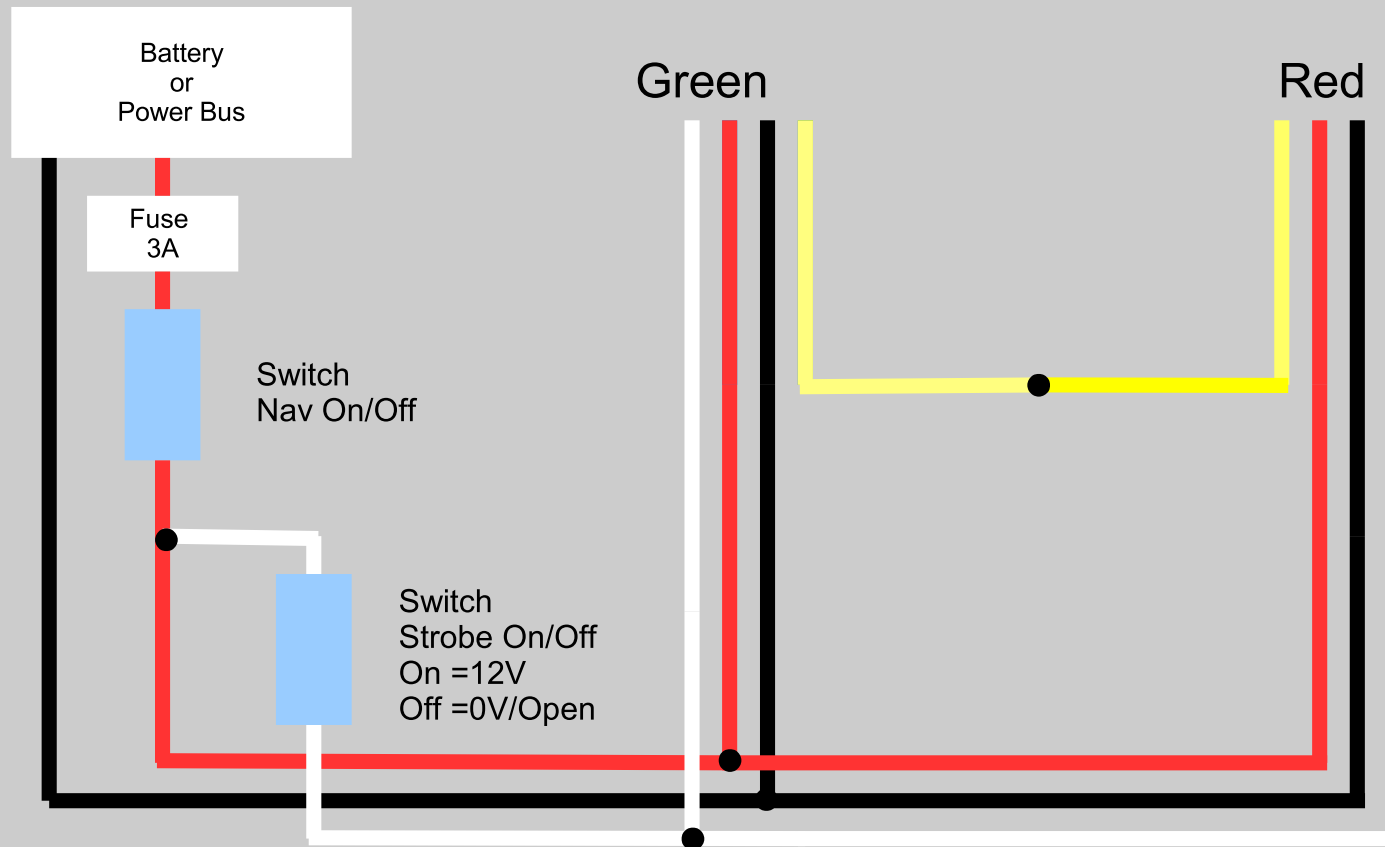

1. RED - (Power) Connect to 12 – 28 VDC
2. BLACK - Connect to 0V (GND)
3. Connect WHITE to Power to enable strobing
Strobe Enable is Active High (Active connected to Power)
4. Connect YELLOW for synchronised flashing
Leave unconnected for individual flashing
DO NOT connect YELLOW ANY other wires
